High quality sauna stones for all purposes

Sauna heater stones are a key part of the sauna experience, but many people do not spare them any thought. The proper quality, size and placement of the stones have a considerable effect on heat retention and steam creation. Harvia sauna heater stones suit all sauna heaters. The high quality of Harvia stones is guaranteed by continuous quality assurance carried out in partnership with the Geological Survey of Finland. Harvia's sauna stones are always safe, clean and ready to use.

The rock material used for sauna heater stones is quarried and monitored carefully to meet the specific quality requirements. This ensures that the stones are safe to use at high temperatures and will not release any emissions. Harvia sauna heater stones are known to remain safe at extreme temperatures, also retaining heat very well to create maximum efficiency.

The sauna stones have been carefully picked and washed, so they are always of the highest quality, and are easy to change. In accordance with sustainability principles, any stones that do not meet the quality requirements will be used for construction and other industries.

Annual change of sauna stones:

- extends the service life of the heater

Harvia illuminated bucket

The illuminated bucket from Harvia is a modern and stylish way to bring both water and light into the sauna room. The base of the bucket can be mounted on a bench surface or the bucket can be embedded in a bench. The LED light in the base illuminates the bucket evenly and the bucket also illuminates its surroundings – the bucket is made of optical plastic for optimal light dispersion. The bucket can be easily lifted off the base for refill and cleaning. Due to the base being a separate part, the electrical components of the light source are protected from water.
